

ZIMBABWE AGRICULTURAL SHOW 2026

INGCEBO PFUMA

pfuma · the Shona word for wealth

Enterprise agri-health intelligence for Zimbabwe

For a rural family, that wealth is standing in the kraal.
We built the system that protects it.

5 ROLES · 1 RECORD

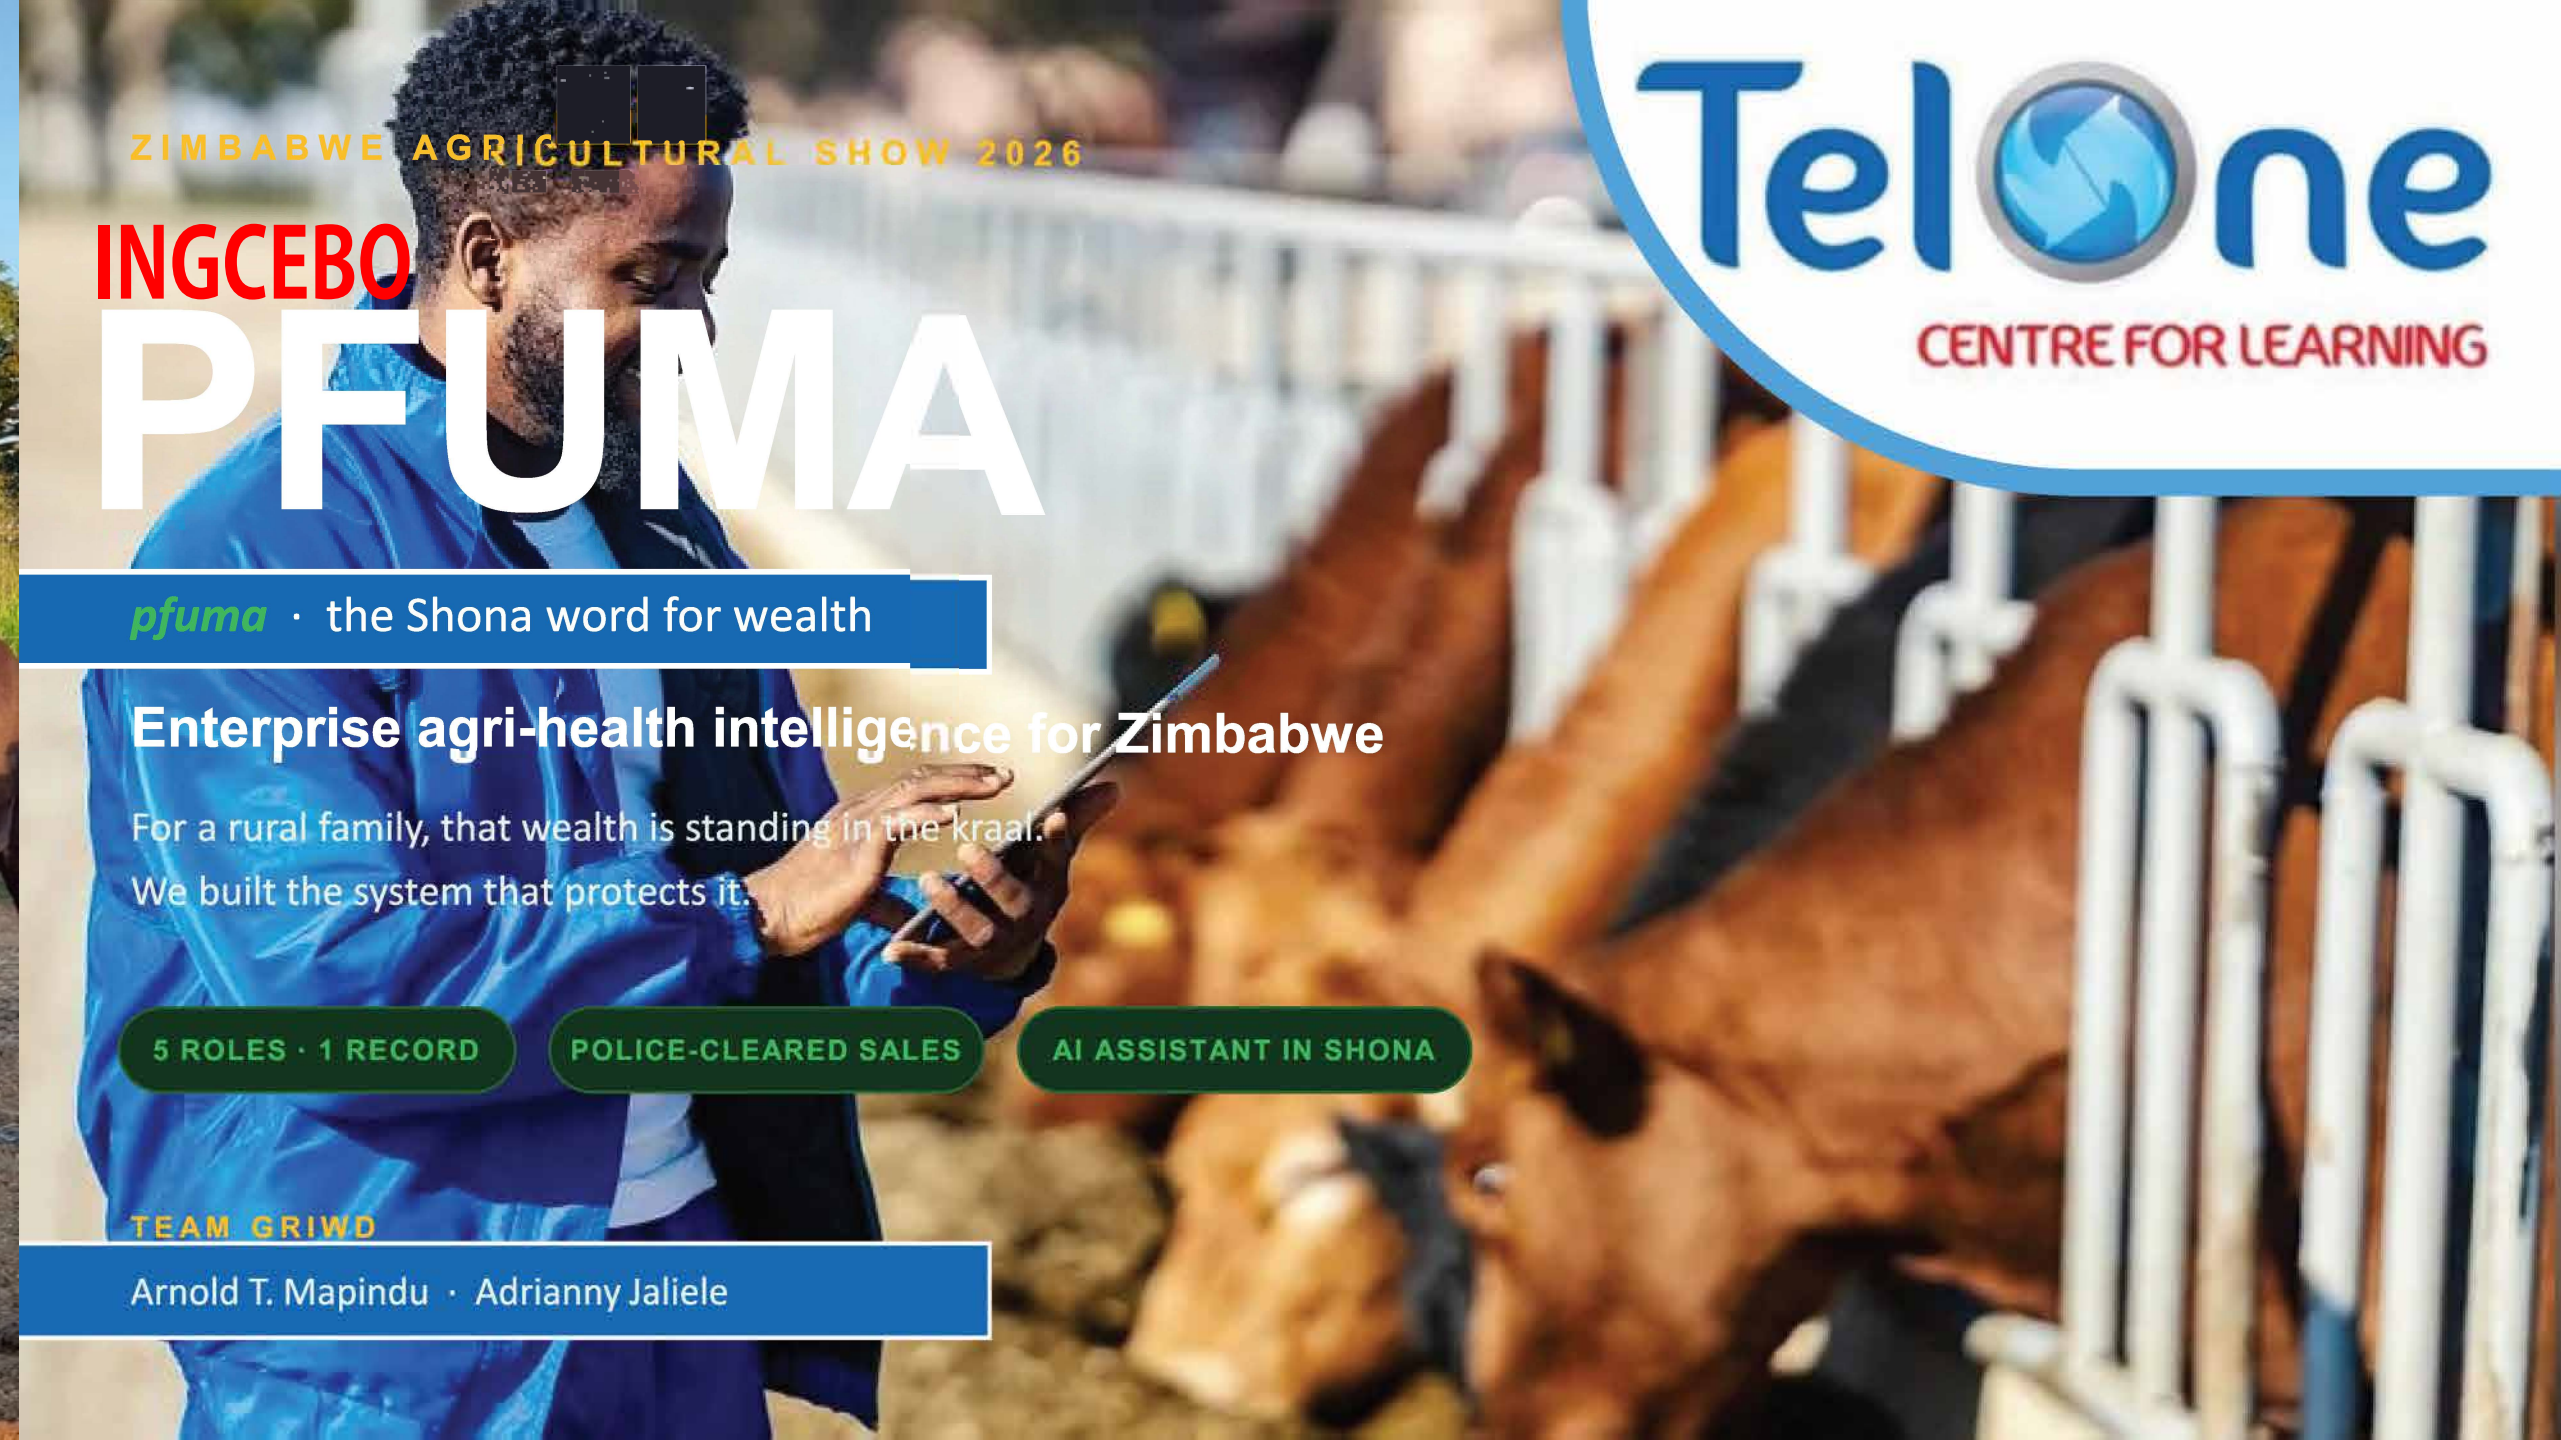

POLICE-CLEARED SALES

AI ASSISTANT IN SHONA

TEAM GRIWD

Arnold T. Mapindu · Adrianny Jaliele

01

THE PROBLEM

Livestock is often a rural family's largest store of wealth. It is also the least protected asset they own.

NO REAL PAPER TRAIL

Records live on paper, memory, or nowhere at all.

CAN'T VERIFY HISTORY

Buyers can't confirm health or true ownership before paying.

DISPUTES, NO EVIDENCE

No fast way to prove a disputed or stolen animal is yours.

INFORMAL, UNDOCUMENTED SALES

Word-of-mouth buyers lowball sellers with no price visibility.

LIVESTOCK WEALTH IS ILLIQUID

Unverified records make it hard to borrow against your herd.

500,000+

LOST TO JANUARY DISEASE

Theileriosis has killed more than half a million cattle in Zimbabwe since 2016. Most of that is preventable if it is caught early.

3,400+

ARRESTS IN ONE CRACKDOWN

Stock theft is organised, not occasional. A single ZRP operation produced over three thousand four hundred arrests.

0

VERIFIABLE DIGITAL RECORDS

Theft, ownership disputes and outbreaks are tracked on paper, by memory, or not at all. A phone call disappears.

ZRP

FORM 392

Z.R. POLICE LIVESTOCK CLEARANCE CERTIFICATE

POLICE STATION LIVESTOCK CLEARANCE REGISTER No.

PART A (PARTICULARS OF OWNER/SELLER)

FULL NAMES OF OWNER Nat. Reg. No.
RESIDENTIAL ADDRESS Livestock Card/ Register No.
PLACE WHERE ANIMAL(S) IS (ARE) KEPT
NAME OF DIP TANK/FARM No.

PART B (PARTICULARS OF BUYER/RECEIVER)

FULL NAMES OF BUYER Nat. Reg. No.
RESIDENTIAL ADDRESS Bus Address
INTENDED DESTINATION OF ANIMAL(S) BOUGHT
MODE OF TRANSPORT DROVER(S) / VEHICLE(S) Tick appropriately
NAME(S) 1 Nat. Reg. No. Signature
2 Nat. Reg. No. Signature
VEHICLE Reg. No.

PART C (DESCRIPTION OF ANIMAL)

CATTLE/DONKEY/HORSE/MULE/PIG/SHEEP/GOAT/CHICKEN/OTHER

PART D (PARTICULARS OF WITNESS)

VILLAGE HEAD Nat. Reg. No.
SIGNATURE Date
VET OFFICER/DIP TANK ATTENDANT Date

SIGNATURE OF SELLER/OWNER Date
VET PERMIT No. Date

PART E (TO BE COMPLETED BY A POLICE OFFICER)

I, No. Rank Name

DO CERTIFY THAT AT THE TIME OF CLEARANCE THE LIVESTOCK DESCRIBED ABOVE HAD NOT BEEN REPORTED STOLEN

Signature Stamp

NOTE: Certificate is valid for 5 days

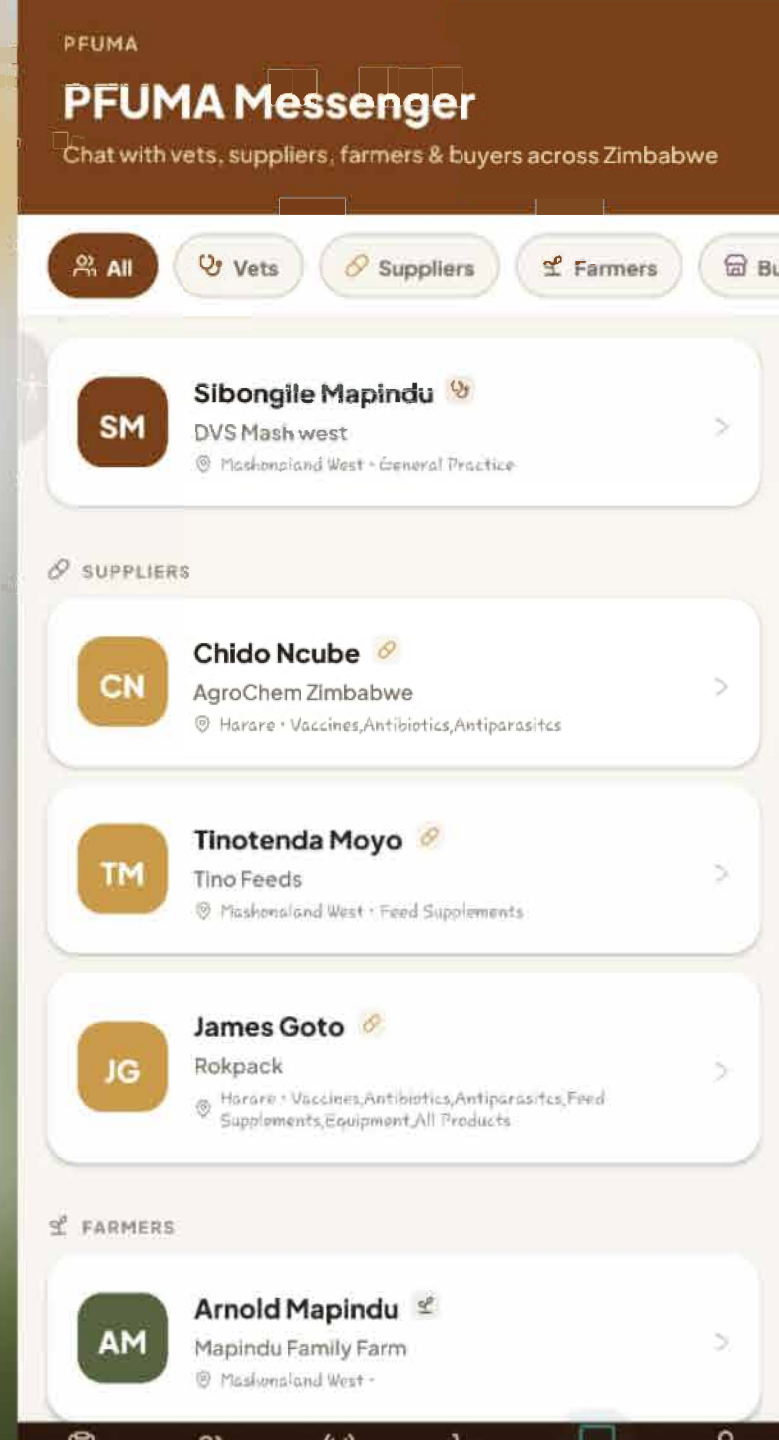

ORIGINAL (SELLER)

Telone
CENTRE FOR LEARNING

The gap isn't goodwill — it's proof. Police cannot clear a sale they have no visibility into, and a buyer cannot check a story he has only been told.

 A buyer sees all of it before paying
Not a stranger's word — a record, with the vet note and the clearance attached.

Not a replacement for the vet or the police.
PFUMA gives that relationship a paper trail. A phone call disappears; a record does not.

03 FIVE ROLES, ONE RECORD

FARMER

Registers animals once — breed, tag, brand, health. Then gets weight tracking, vaccination due-dates and overdue flags, and a verified profile buyers trust.

VETERINARIAN

A caseload dashboard by province and district — real surveillance data, not guesswork. Farmers consult directly; certificates become permanent record.

SUPPLIER

Feed, medicine and vaccines sold straight to the farmers in each district who need them — instead of a phone call and a guess.

RETAILER / BUYER

Every listing has passed police clearance, and usually a vet certificate, before it is even visible. You buy a record, not a promise.

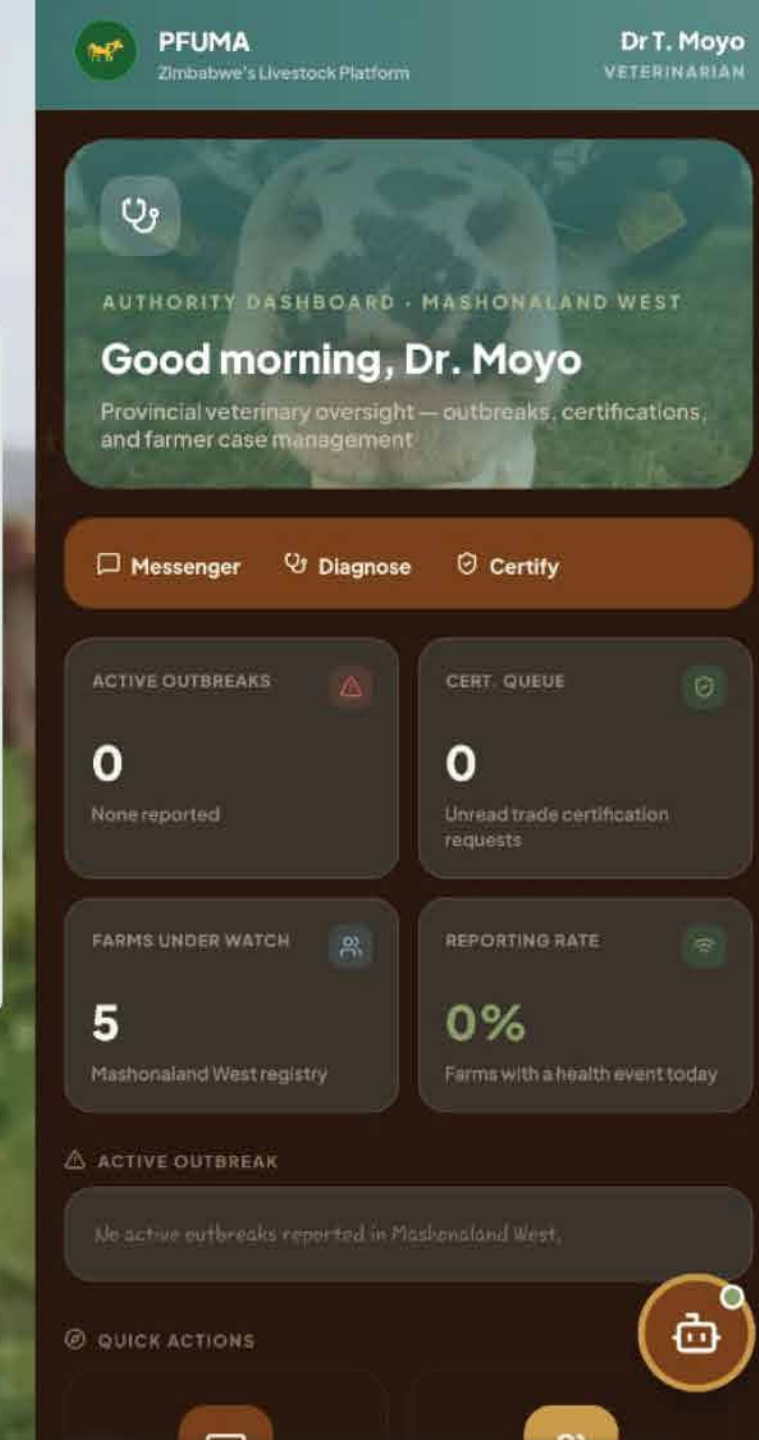

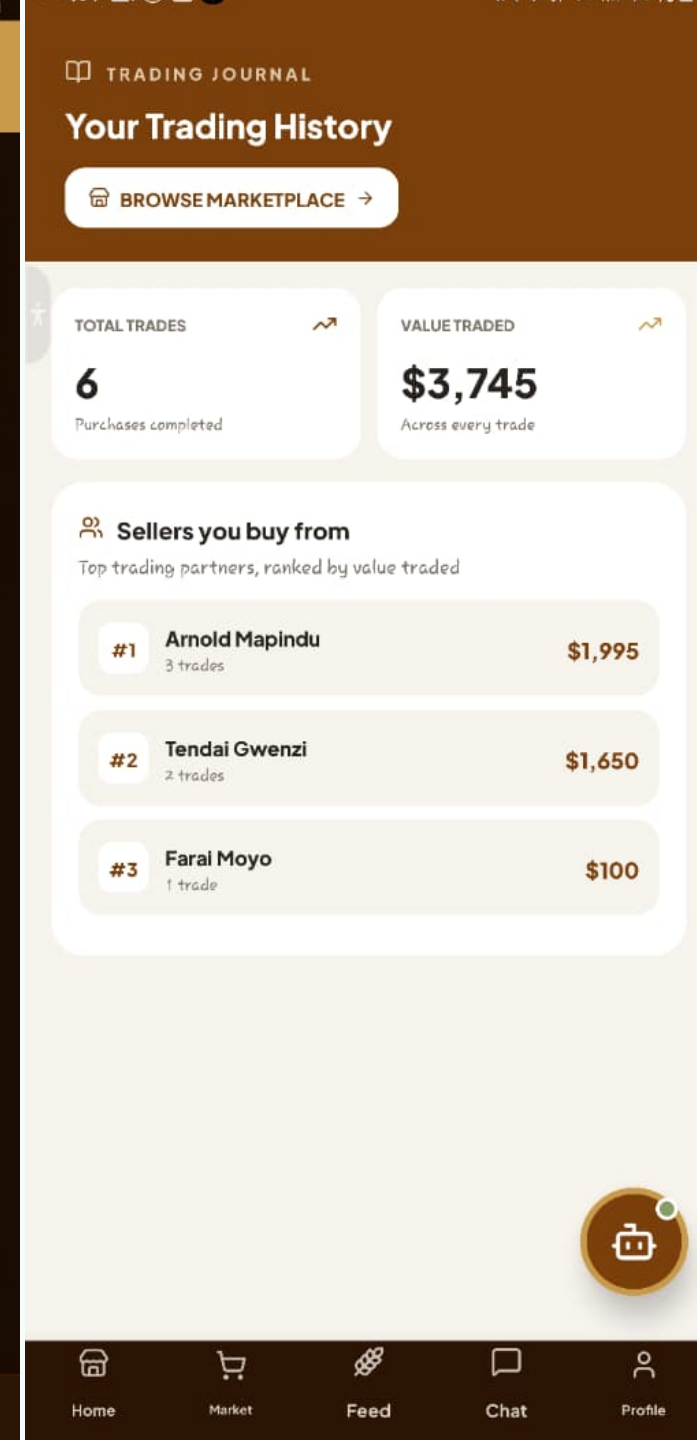

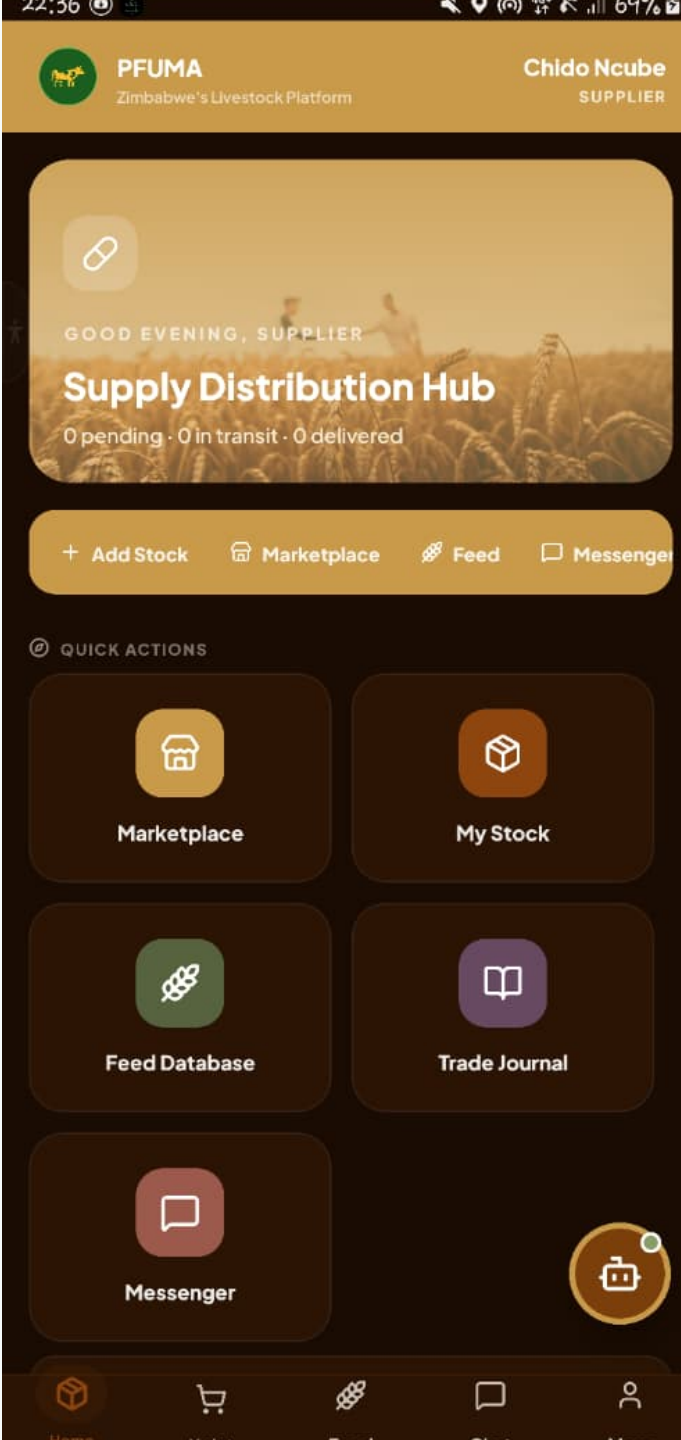

POLICE

Reviews signup applications, verifies ownership and brand papers, and issues the movement-permit number that unlocks a sale.

Nobody self-certifies. Police accounts are provisioned by an existing verified officer — never self-service. Vet applications are peer-reviewed by an already-verified vet. Every role uploads an ID plus a role-specific credential.

Ask what they do, then use the matching pitch — the same platform sounds different to a farmer, a vet and a buyer.

07

BUILT ON ZIMBABWEAN LAW

Every headline feature maps to a specific Act — researched, cited, and in the repo for anyone who wants to check it.

WHAT PFUMA ENFORCES	THE LAW IT OPERATIONALIZES
Listings start pending_clearance; an officer verifies ownership and brand papers and issues a movement-permit number	Stock Theft Prevention Act [9:18]
Vet signup requires a CVSZ registration number, peer-reviewed by an already-verified vet	Veterinary Surgeons Act [27:15]
Animal records capture brand mark, tag ID and dip-tank; "no brand on record" is flagged before a sale	Brands Act + Livestock Identification Regs
Jinda pushes toward DVS or police reporting when a notifiable-disease pattern appears	Animal Health Act [19:01]
Cross-district sales prompt for a DVS veterinary movement permit alongside police clearance	The "two-gate" movement process
Retailer signup requires acknowledging disclosure, fixed pricing and the statutory right of return	Consumer Protection Act [14:44]

Said honestly: this is researched and citable, not a lawyer-certified audit. Sources are ZimLII, FAOLEX, CVSZ, Veritas and the Consumer Council — and where a detail could not be confirmed, the research says so plainly instead of guessing.
